Ivan's new Project

Herman Goring was a Mosquito supporter. He is supposed to have said. "In 1940 I could fly to Glasgow in most of my aircraft, but not now. It makes me furious when I see the Mosquito. I turn green and yellow with envy. The British, who can well afford aluminum better than we can, knock together a beautiful wooden aircraft that every piano factory over there is building....They have geniuses and we have nincompoops!"

This is what motivation me to build the Brian Taylor Mosquito fighter bomber!

I will likely paint it as the aircraft that George Stewart flew. (George, a friend of Harold Jones, gave a talk at our club some years ago. ed)

This aircraft was partially built. I bought it from an estate sale from Owen Sound last summer. Ivan Wismayer
